1. The following is an examiner's statement of reasons for allowance: none of prior art of record taken alone or in combination shows a soft start circuit in a DC-DC converter and a method thereof comprising a switch coupled between a soft start capacitor and an output node, that is open when the converter is enabled, and closed when the converter is disabled to cause shorting the soft start capacitor to the output node, and precharging the soft start capacitor to the value of the output voltage at the output node as recited in claims 1-4; or a switch coupled to a buffer amplifier and to an output node and being operative, for a first condition, to connect the first input of the buffer amplifier to the output node to cause the soft start capacitor to charge up to the output voltage at the output node and, for a second condition, to disconnect the first input of the buffer amplifier from the output node and connect the first input of the buffer amplifier instead to the reference voltage as recited in claim 5.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Matthew V. Nguyen whose telephone number is (571) 272-2081.
